

SPECTRO LUBRICANT TECHNICAL DATA

Golden Shock Fluid

Description

Spectro Golden Shock Fluids were developed to meet the critical demands of today's suspension systems under racing conditions. They virtually eliminate fade and foaming due to thinning and air entrapment. They exhibit temperature stability characteristics equal to or better than those of the OEM fluids they are designed to replace. Spectro Golden Shock Fluids contain an additive package that assures outstanding rust and corrosion resistance and wear protection.

Application

Spectro Golden Shock Fluids should be used according to the manufacturer's recommended change intervals, fill level and viscosity.

For Racing Use

Golden Spectro Shock Fluids are fade resistant beyond any comparable fluids and are ideal for road racing, motocross, dirt track off-road and street use.

- EXCEPTIONALLY HIGH ANTI-WEAR ADDITIVE TREATMENT REDUCES WEAR
- EXTENDS COMPONENT LIFE
- ULTRA LIGHT - FOR REPLACEMENT OF THE OEM FLUID IN SHOCKS
- VERY LIGHT - FOR USE IN SHOCKS THAT SHOW SOME USE WEAR
- EXCEPTIONAL OFF-SEASON PROTECTION OF INTERNAL PARTS

Typical Inspections

Ultra Light Very Light

Kinematic Viscosity @ 100° C cST	4.4	9.9
Kinematic Viscosity @ 40° C cST	10.4	26.4
Flash Point, °C	110	110
Pourpoint, °C	-60	-60
Viscosity Index	385	400
